Eligible to sign an internship agreement via IE University

## SUMMARY

Dual-degree student in Business Administration and Computer Science and Artificial Intelligence at IE University, combining software and data science with business fundamentals. Completed a Data Science and AI internship at NFQ, delivering machine learning and language-model analytics into a live supplier platform, and builds AI-agent and quantitative finance products as personal ventures. Native Spanish and English speaker, available for internships from June 2027.

## EDUCATION

### IE UNIVERSITY (IEU)

Madrid, Spain

#### Dual Bachelor in Business Administration and Computer Science and Artificial Intelligence

Expected: July 2030

- Relevant subjects taken include: Computer Programming I, Calculus, Probability, Matrices and Linear Transformations, Cloud Computing, Corporate Finance, Capital Markets, Macroeconomics, Entrepreneurship.

### COLEGIO SAN PATRICIO

Madrid, Spain

#### International Baccalaureate (IB) Diploma

Graduated: June 2025

- Completed Mathematics: Analysis and Approaches at Higher Level, alongside sciences and humanities.

## EXPERIENCE

### NUFLOW

Madrid, Spain

#### Founder and Builder

May 2026 - Present

- Building a B2B platform delivering tailored AI-agent solutions, adapting each agent to client processes.
- Defining product scope and technical architecture from scratch, working hands-on with LLM tooling, agent frameworks and workflow automation.
- Developing first use cases end to end, from problem framing to working prototypes.

### NFQ

Madrid, Spain

#### Data Science and AI Intern

June 2026

- Segmented supplier base of NFQ Corporate division with unsupervised learning (clustering), turning an unstructured portfolio into comparable groups.
- Developed a supplier value score on top of those clusters, combining operational KPIs with language-model reasoning to rank suppliers.
- Designed an NLP module (prompt engineering, structured outputs, grounding) generating one automatic executive summary per supplier.
- Integrated a full pipeline into NFQ 360 Supplier View platform, closing with technical documentation and a final presentation to architecture and analytics teams.

## EXTRACURRICULAR ACTIVITIES

- **WhisperTool - Open-source voice-to-text app for macOS:** Built and published a dictation app running OpenAI Whisper on-device, with a global push-to-talk hotkey and instant auto-paste. (Madrid, Spain. 2026).
- **Quantum - Personal quantitative finance portfolio:** Completed 3 of 12 planned projects: CAPM Explainer (live expected-return calculator), Inflation Forecaster (SARIMA on US CPI), and Credit Scorecard (logistic model with stability selection and bias audit). All shipped as open repositories on GitHub with working-paper style web UIs. (Madrid, Spain. 2026).
- **IE Startup Lab - Innovation and venture creation programme:** Joined as an active participant in IE University entrepreneurship programme. (Madrid, Spain. 2025 - Present).

## ADDITIONAL INFORMATION

- **Computer Skills:** Python, HTML, front-end development, Git and GitHub, UI/UX; unsupervised learning, NLP, prompt engineering, LLM and AI-agent tooling, workflow automation; advanced user of MS Office and macOS.
- **Languages:** Spanish (Native). English (Bilingual, daily use since childhood).
- **Interests:** Football; fintech, startups and digital products; technology entrepreneurship and AI in business.
